

# Print & Make!: the FREAKY Mobius Strip!

This FREAKishly FUN gizmo was invented by the galaxy's smartest Battle Slug - Dr. Slymithicus Slugoza!

Haha - just KIDDING!

The Mobius Strip was REALLY invented right here on EARTH over 200 years ago by a really REALLY smart guy named August Ferdinand Mobius.

So what's so FREAKY about a piece of paper?

Let's FIND OUT!

START by CUTTING out ONE of the paper strips.

Next, match up the ends to make a LOOP

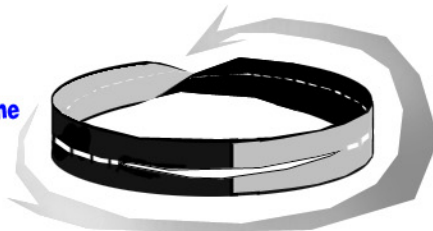

Now give ONE end a TWIST

And TAPE the ends together.  
You should now have a LOOP with a TWIST

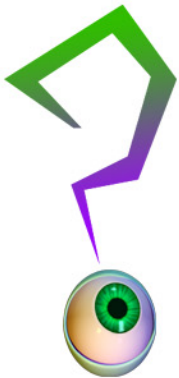

Now carefully begin to CUT along the MIDDLE of the loop

CUT all the way from one end to the other

Try to GUESS what will happen when the loop is CUT.

**RU surprised?**

Give the 2nd Mobius Strip to a friend and surprise THEM!

**WEIRD**  
new worlds of fun  
on DVD!
